**DETAILED ACTION**

**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: In claims 1 and 11, "the" before "RF signals" has been deleted to avoid lack of proper antecedent basis.

***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose a multiple beam linear system and a controlling method therefor having at least two linear accelerator waveguides tuned to different resonant frequencies that are spaced apart to allow only one of the at least two linear accelerator waveguides to accept a given high power RF pulse, an RF generator including an RF power device for providing high power RF pulses alternately at the different resonant frequencies and a modulator for providing high voltage pulses to the RF power device in synchronization with RF signals (claims 1, 11 and 18). The remaining claims 2-10, 12-17 and 19-21 are allowed by virtue of their dependencies on the independent claims. Hence, the examiner has allowed claims 1 through 21.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Mishin et al., Patent No. 5,744,919 ; Haimson, Patent No. 4,713,581 ; Whithman, Patent No. 6,593,579.

None of the above patents discloses the multiple beam linear system as recited.
